MESSAGE STRUCTURE

Total Segments: 4-21 (more = richer data)
Unique Types: 4-14/14 (14 = complete)

HOW TO IMPROVE

1. Add missing segments (NK1, PV2, DG1, PR1, IN2, ROL)
2. Populate more fields in existing segments
(demographics, clinical notes, vital signs, diagnoses)
3. Include multiple instances for rich data
(multiple OBX for different observations,
multiple DG1 for comorbidities, etc.)
4. Target 14/14 segment types for maximum quality scores
